grade

teacher

The Spiral Learning Map records the class's progress in Visual Art. 3rd grade teachers begin highlighting the "mile markers" nearest the center of the Spiral and 6th grade teachers begin by highlighting the mile markers already learned and begin leading students more toward the outside of the Spiral. The Rainbow Charts lay out lessons for the mile markers on the Spiral and therefore help each of the different grade level teachers find about where on the Spiral to locate their class and begin moving. For all grades, many mile markers will be revisited and practiced to develop, deepen, and broaden the class's skills and experiences.
